RECEIVED

JUN 11 1987

ERD-REMEDIATION ACTION SEC.

TO: Gary Klepper, Chief - Site Assessment Unit

FROM: Mike Czuprenski *MAC*  
Environmental Response Division - Northville

Subject: New Act 307 Site of Environmental Contamination  
~~Chrysler Trenton Chemical Plant~~  
~~Wayne County~~

Per the attached, Chrysler has identified 3 acres at their Trenton Chemical Plant as a site of environmental contamination. They are finishing up their preliminary investigatory work and their consultant has told me that they will soon be initiating a hydrogeological evaluation.

Please have staff record this site on the Act 307 list until such time that appropriate cleanup is effected and a delisting petition approved which shows that this site is no longer one of environmental contamination needing further evaluation.
